County Labor Force Estimates 1980-1984.....	26-30

ABOUT THE DATA

The statistics contained on the following pages--other than those adjusted for seasonal variations--have been produced in cooperation with the U.S. Department of Labor, Bureau of Labor Statistics. These series include recent benchmark introductions which revise material previously published in the Colorado Labor Force Review. Labor force estimates have been adjusted to the 1984 Current Population Survey. Industry employment and earnings data have been benchmarked to March 1984 employer reports.

For the most part, data back to 1980 for all series is displayed in this publication--seasonally adjusted material appears for the period 1977 through 1984. Other historical information is available upon request.

LABOR MARKET DEVELOPMENTS DURING 1984

The economies of both Colorado and the nation showed much improvement in 1984 despite some slowing in certain quarters during the later portion of the year. National unemployment averaged only 7.5 percent, the lowest mark since 1980. During 1983, joblessness in the U.S. had been a substantial 9.6 percent as the economy struggled to bounce back from the worst recession in 50 years.

Corresponding to the improvement in the jobless rate, the number of Americans without work declined by nearly 2.2 million during 1984. That is the first annual drop for the series since 1979 and a good indicator of economic strength.

Marked improvement was also apparent in the Colorado economy as the State's unemployment rate dropped to 5.6 from 1983's 6.6. At the same time,the number of unemployed plunged by 15,000 to reach 96,000. That is the largest single-year decline in joblessness in the history of the present data series (going back to 1970).

Labor statistics show that employment in Colorado rebounded much more quickly than the national average from the 1982 recession. This burst of growth in the State has leveled off during the current period, however, at the same time the pace has quickened at the national level.

The national rate of new job formation rose to 4.1 percent last year as economic expansion picked up steam. In Colorado, the rate of employment growth averaged a more moderate 3.3 percent after reaching 6.2 during the prior year. U.S. employment had expanded at an annual rate of only 1.3 percent in 1983.

During the closing months of 1984, Colorado and the rest of the nation began to experience some sizable layoffs in high-tech manufacturing as market readjustments hit producers of data processing equipment. Going into 1985 more than 4,000 jobs had been lost in Colorado. This had very little affect on 1984 labor statistics, however, since the bulk of the layoffs were registered so near year's end.

1984 HIGHLIGHTS

* The total number of Colorado jobholders reached a record 1.61 million in 1984. The level of unemployment, however, was still the third highest ever recorded at 96,000.

* Regular State benefits to unemployed persons paid out under the Colorado Employment Security Act totaled almost $150 million, down 37 percent from the prior year.

* The Colorado unemployment insurance trust fund, which had been depleted near the end of 1982, began to move in a positive direction again during April 1984. At the close of 1983, Colorado borrowing from the federal government to sustain the fund had reached nearly $114 million. By December 1984, Colorado's federal loan still outstanding was down to just over $31 million.

* The number of private employers covered under the Colorado Employment Security Act rose to nearly 83,300 during the first quarter of 1984, up 4.5 percent from the same period in 1983. Wages paid during the quarter were up almost 11 percent reaching close to $5.2 billion.

* The only nonagricultural industry to record a job loss during 1984 was mining which edged downward by 100. Continued weakness in the oil and gas sector offset gains in other areas to bring about the loss. This marks the third consecutive year of decline for the industry.

* For the fifth year in a row the services industry registered the largest job growth in the State, up 15,700.

* More Coloradans are employed in trade than any other industry. During 1984, trade accounted for nearly one-quarter of all nonagricultural wage and salary employment.

COLORADO
ANNUAL NONAGRICULTURAL WAGE & SALARY EMPLOYMENT GROWTH
HISTORICAL SUMMARY

	1974 THRU 1983					
	Yearly Average [1]	Poorest Year (Jobs)	(Year)	Best Year (Jobs)	(Year)	1983-84 New Jobs [1]
Total Nonag. Wage & Salary	39,120	3,800	75	91,800	78	57,600
Mining	2,110	- 6,200	83	7,200	81	- 100

* Due to rounding, sum of individual items may not equal totals. Estimates include all full-time or part-time wage and salary employees who worked or received pay during the week including the 12th of the month. Nonagricultural self-employed, unpaid family workers, and domestics are excluded. Estimates based on March 1983 benchmark utilizing 1972 Standard Industrial Classification Coding. Data compiled in cooperation with the U.S. Department of Labor, Bureau of Labor Statistics.
February 1984

ESTIMATED COLORADO NONAGRICULTURAL WAGE AND SALARY EMPLOYMENT FOR 1981

* Due to rounding, sum of individual items may not equal totals. Estimates include all full-time or part-time wage and salary employees who worked or received pay during the week including the 12th of the month. Nonagricultural self-employed, unpaid family workers, and domestics are excluded. Estimates based on March 1983 benchmark utilizing 1972 Standard Industrial Classification Coding. Data compiled in cooperation with the U.S. Department of Labor, Bureau of Labor Statistics.
February 1984

* Prepared in cooperation with the Bureau of Labor Statistics. Averages are based upon data for full and part-time production and related workers, including the nonsupervisory employees and working supervisors who were employed during the pay period including the 12th of the month. These average earnings are computed on a "gross" basis and may reflect changes in premium pay for overtime and late shift work as well as changes in basic hourly and incentive wage rates. Average hourly earnings are not wage rates but are averages of gross earnings of all employees below the administrative level.

** Labor Market Area includes Adams, Arapahoe, Boulder, Clear Creek, Denver, Douglas, Gilpin, and Jefferson Counties.

Colorado Division of Employment and Training - Labor Market Information.

* Prepared in cooperation with the Bureau of Labor Statistics. Averages are based upon data for full and part-time production and related workers, including the nonsupervisory employees and working supervisors who were employed during the pay period including the 12th of the month. These average earnings are computed on a "gross" basis and may reflect changes in premium pay for overtime and late shift work as well as changes in basic hourly and incentive wage rates. Average hourly earnings are not wage rates but are averages of gross earnings of all employees below the administrative level.

* Labor Market Area includes Adams, Arapahoe, Boulder, Clear Creek, Denver, Douglas, Gilpin, and Jefferson Counties.

** Prepared in cooperation with the Bureau of Labor Statistics. Averages are based upon data for full and part-time production and related workers, including the nonsupervisory employees and working supervisors who were employed during the pay period including the 12th of the month. These average earnings are computed on a "gross" basis and may reflect changes in premium pay for overtime and late shift work as well as changes in basic hourly and incentive wage rates. Average hourly earnings are not wage rates but are averages of gross earnings of all employees below the administrative level.

Colorado Division of Employment and Training - Labor Market Information.
